HG natural stone cleaner shine restorer (product 37)

- sufficient for mopping 20 times

HG natural stone cleaner shine restorer is a freshly scented, concentrated mopping cleaner specially developed for regular cleaning of marble and all other types of calciferous natural stone floors. It is suitable for both untreated floors and floors treated with *HG natural stone protector (product 33)*. 1 litre is sufficient for 20 washes.

Directions:

For regular cleaning:

Dissolve 50 ml (half a cup) in half a bucket (5L) of lukewarm water. Then clean the floor with a wrung-out mop or floor cloth, regularly rinsing it in the cleaning solution. Do not rinse or mop dry, simply leave the floor to dry on its own.

For intensive soiling or to remove the gloss coating of this product:

See the HG natural stone floor treating matrix on the side of this bottle.
