# Algae and mould remover

## ready to use

**Self-acting formula, quick results**

No scrubbing, long-lasting results

Works on all surfaces

## HG algae and mould remover ready to use

- works within 36 hours
- sufficient for 25 to 50 m<sup>2</sup>
- ready-to-use in a pouring can
- self-acting, without scrubbing

*HG algae and mould remover ready to use* is a surface biocide for use at home against fungi, moulds, lichen, mildew, and algae on external hard surfaces such as masonry, tiles, concrete, metal and glass. The treated surfaces do not require any scrubbing and/or rinsing. The result is visible within 36 hours. This product is fully biodegradable and can be used on all surfaces.

**Directions for use:** *HG algae and mould remover ready to use* should be used in dry weather. For an optimum result, there must be no rainfall for up to 8 hours after use. The surface being treated must be dry. Unscrew the sprinkler of the watering can, **use a sharp knife to carefully cut off a thin edge (maximum 1 mm thick) from the spout** and then turn the spray head back on the watering can. Leave the cap on the watering can closed. When pouring, completely tilt the watering can until the spray head is pointing straight down and then spray the surface. If the spraying slows down, briefly turn the watering can upright to let in some air.

For the long-term prevention of green deposits we recommend treating the surface again with *HG algae and mould remover ready to use* in keeping with the instructions given above.
