Air fryer cleaner

Powerful cleaning

Dissolves stubborn grease and food residue

Patented formula specially designed for air fryers

HG air fryer cleaner

- **powerful against grease, safe for the air fryer**
- **sufficient for cleaning up to 5 times**
- **easy to use**
- **includes brush**

Using air fryers produces a persistent deposit of caked-on grease and food. This deposit is impossible to remove, even with the best washing-up liquids, degreasers, or in the dishwasher. *HG air fryer cleaner* is a unique, extremely powerful cleaner. Really hard on the deposits, but mild to the air fryer ensuring it is not affected or damaged.

Directions for use:

1. Make sure that the air fryer basket and inner pan have cooled down and place them in the sink.
2. Pour 50 ml of liquid (about a fifth of the bottle) in the inner pan and use the supplied brush to coat the rest of the inner pan and the basket.
3. Leave the inner pan and basket in the sink to soak for one hour and then rinse thoroughly with warm water. If necessary, use a soft washing-up brush or non-abrasive sponge to remove the loose deposits. (For hard-to-reach areas such as edges and corners, try using an old, soft toothbrush.)

Caution: Transport and store the bottle upright. Protect from frost. Also suitable for accessories such as a baking mould, grill pan or grill. Do not apply to the heating element or the outside of the appliance. Use a damp cloth for this purpose. A second treatment may be needed for very stubborn deposits. **The *HG air fryer cleaner* may work less well for an inner pan or basket that has been seriously damaged or that has a large amount of carbonised fat, as a result of frequent use.** Immediately remove any splashes or spills on natural stone, composite or painted surfaces and rinse with plenty of water.
