Toilet cleaner gel

super powerful

10x stronger against limescale*

Intensive cleaner and descaler

Shiny enamel without damage

HG toilet cleaner gel super powerful

- does not affect the glaze at all
- extremely powerful, removes even the most stubborn scale and deposits

Difficult to remove deposits can form in any toilet. Problem dirt such as persistent limescale, urine stains, or other difficult to remove deposits occur on the inside of the toilet bowl, but also in the neck or invisibly under the rim. The dirt under the rim means the toilet is never hygienically clean – it can cause a musty odour and it reduces the flush action of the toilet. The specially developed formula of *HG toilet cleaner gel super powerful* adheres to the surface of the toilet bowl and ensures an effective removal of all problem dirt. This product does not contain hydrochloric acid, because that substance affects the glaze of your toilet pan and makes it rough. Furthermore, hydrochloric acid gives off vapours that affect and damage the surface of stainless steel and chrome in your bathroom. In other words, *HG toilet cleaner gel super powerful* is safe for glaze, stainless steel and chrome.

Directions for use: Shake the bottle well before use! Squeeze the sides of the lid and simultaneously turn the lid to open. Spray *HG toilet cleaner gel super powerful* deep under the rim of the toilet bowl and in the bowl. Leave the gel to work at least 20-30 minutes and then brush the toilet bowl clean with a toilet brush. Finally flush the toilet.

**10 times more effective against limescale than bleach*
